Andrew Seaboyer - Web Developer

aseaboyer.com - **aseaboyer@gmail.com**

objective

Create websites, browser-based applications, and interactive assets with special attention to usability and performance with the goal of creating engaging experiences.

experience

My experience includes:
- a BA in Web Design and Interactive Media
- eight years experience in the Web Development Industry
- experience leading and managing teams
- highly proficient with: HTML5, CSS3, Javascript, Jquery, PHP, Photoshop, WebGL, Drupal
- experience building custom content management systems in order to simplify and improve client workflows
- excellent planning and communication skills

employment history

Intrax, San Francisco, CA Web Developer, 2013 - 2015
Work with a growing team to:
- create highly customized, yet flexible javascript and jquery features to meet site needs
- develop and extend Drupal modules
- update and maintain content within Drupal
- architect and develop application connections, such as Salesforce to Drupal

Pointroll, Boston, MA HTML5 Developer, 2013
Worked with a small startup team to:
- maintain a PHP/Javascript codebase which dynamically converts user-created Flash assets into HTML5 compositions
- create animations and effects which mimic Flash tweening and effects

Northeastern University, edtech, Boston, MA Internet Systems Developer, 2010 - 2012
Worked with a small team to test and provide classroom technology for teachers and students to:
- build, upgrade, and maintain custom content management systems for grant-funded projects
- manage website and content updates in Wordpress
- design, build, and implement Wordpress plug-ins

Boston College, Office of Marketing Communications, Chestnut Hill, MA Web Developer, 2007 - 2010
Worked with a team on a wide range of projects including:
- manage content across several school's sites within the university
- develop and deploy HTML email flyers and marketing campaigns
- design, build, and deploy a content management system, allowing customers to create their own rich HTML Newsletters
- design, develop, and implement forms and supplemental web pages associated with large scale email marketing campaigns
- manage content and functionality updates in multiple content management systems, including: Wordpress, Campaign monitor, and Serena Collage

Big Fish Communications, Brookline, MA Lead Web Developer, 2005 - 2007
Worked with a marketing team to:
- manage, hire, and mentor a group of talented employees and interns
- design, develop, and deploy websites for a wide range of companies in the technology sector
- work closely with clients to assess their needs and the needs of their target audiences
- evaluate emerging web technologies to provide clients with the widest array of effective solutions

education

The New England Institute of Art, Brookline, MA BA, Web Design and Interactive Media, 2007
- studied web design and graphic design standards
- learned modern programming methods associated with web development
- explored 2-D and 3-D animation practices and fundamentals
